NATUREFORMER KFD 75

Kiefel Dry Fiber Technology meets both sustainability and economical efficiency

- Energy saving and process acceleration due to minimized water use and elimination of drying steps.
- Top-quality products with excellent surface finish and tailored barrier properties are produced with just one forming step.
- Fast cycle times combined with reliable high-volume production ensure maximum productivity.
- Proven Kiefel thermoforming equipment, a multi-step automated process, and rapid tool changes guarantee consistent performance and process stability.
- Direct paper-reel processing, full automation, and highest productivity per square meter with significantly lower unit costs.

Technical Data

Max. forming area	750 x 500 mm
Max. height of formed product	60 mm
Pressing force	600 kN
Production speed	> 10 cycles / minute
Footprint	12,3 x 2,2 m
